

A 2020 Vision of Health and Social Care in Sheffield

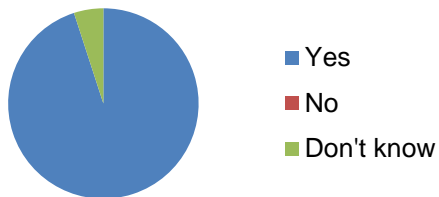

This event at the Town Hall focused on the changes required in health and social care over the next 5 years.

A presentation was followed by interactive voting.

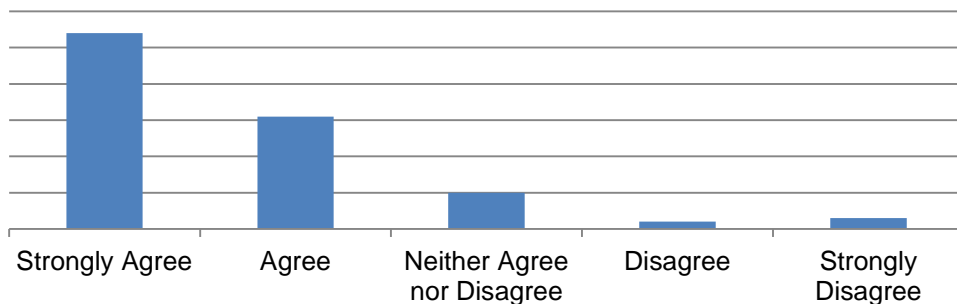

Participants were then encouraged to join open space discussions and share their views.

People could follow the event and comment on Twitter and there was extra support for people who wanted to learn how to tweet.

Do you recognise that care provision needs to change?

To what extent do you feel that health and social care services can't just do more of the same?

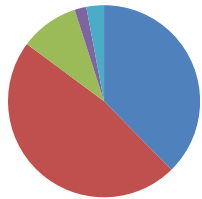

Our thinking so far - aims

- Reducing need for A&E attendance and emergency admissions (20% reduction target)
- More local specialist diagnosis and management of health problems, making best use of technology, reducing hospital outpatient attendances
- Single assessment for long term care and pooled health and social care budgets, helping people to stay at home where possible and reducing placements in care outside Sheffield
- Development of specialist services in Sheffield to provide care to South Yorkshire and wider populations
- Reducing the gaps in life expectancy in Sheffield
- Quality of care and patient experience must continue to be improved

Open discussions:

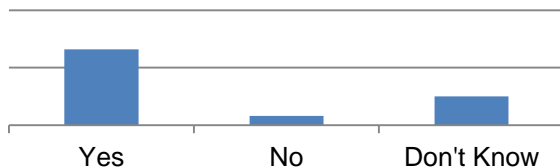

- How can we improve the way we respond if you have an emergency?
- How can we better help you to stay well?
- What's missing?
- What do you want to know more about in relation to our vision? How do you want to be involved?
- What should health and social care services do to help reduce health (and social care) inequalities?
- What should our priorities be in spending the money we have for health and social care in Sheffield?

How far do you agree these ideas are really important for Sheffield?

- Strongly Agree
- Agree
- Neither Agree nor Disagree

Would these ideas improve things for you and people you know?
